

MACC Program Acknowledgement: Background Checks & Employment Screens

Medical Assisting Clinical Certificate (MACC) students may be required to complete a background check, fingerprinting and drug screen through Selection.com if going on an Practicum/placement. The results of prior background checks that a student has received for reasons unrelated to the College are not acceptable.

Note, the MACC program does not require background check, fingerprinting and drug screen be completed for students who are NOT being placed in a practicum or externship. **However, this serves as notification that past misdemeanor or felony conviction may disqualify you from entering a clinical site, testing for licensure, or being hired by potential employers in healthcare professions.** If a student proceeds with their education, they must do so with the understanding that there are no guarantees that they may be certified after they graduate and may not be eligible to be employed by The Christ Hospital Health Network or any other organization.

Please sign this document as acknowledgement of information above and return to Dallas McCray Smith via e-mail at dallas.mccraysmith@thechristcollege.edu or by fax to 513-585-3540.

I, (print name) _____, agree to the requirements listed above and understand additional eligibility requirements may be necessary to seek certification or employment in the field.
