2021-22 Return to Campus: A Guide for Students

The health and wellness of Christ College’s campus community plays a critical role in our ability to support your success. As such, careful consideration has been given to how we will return to campus amidst COVID-19 in a way that helps minimize the risk of transmission while keeping you engaged in the excellent experiences you have come to expect at TCC. In this document you will find measures, requirements, guidelines and precautions intended to support the health and safety of you and those around you. Materials from experts at TCHHN, the CDC, and the Ohio Department of Health were all referenced in the creation of this document.

I understand that the uncertainty and risk surrounding COVID-19 can be unnerving. For this reason, it will be vital that we continue to pull together as a community to support one another during a most unusual year. We have been adapting in exceptional ways since March 2020, so I have every confidence that we will persevere! I will count on you to hold yourselves and one another accountable to the guidelines described in this document and role model healthy behaviors as future healthcare providers.

Thank you in advance for your patience and flexibility. Together, despite a global pandemic, we can make the 2021-2022 academic year our best yet!

Gail Kist-Kline
President

Portions of this document were adapted from the University of Cincinnati’s “Return to Campus Guide: Fall 2020” and TCHHN’s “COVID-19: Employee & Patient Care Pathways”

Important Highlights

You are responsible for carefully reading this guide in its entirety. However, bulleted below are some of the most important highlights pertaining specifically to requirements and expectations, effective immediately and until further notice:

- You are required to wear a surgical mask while on campus, regardless of vaccination status. Cloth face coverings are no longer acceptable. It is the expectation that all TCC community members help hold one another accountable to these requirements. (Updated 1.2.21; 3.17.21; 8.30.21; 1.5.22)
- You are expected to take your temperature and assess your symptoms before reporting to campus each day. If you have a temperature of 100.4 degrees or higher, or if you are experiencing other COVID symptoms, you should remain home and contact your faculty and the Dean of Student Affairs, Dr. Meghan Hollowell (Meghan.Hollowell@TheChristCollege.edu). (Updated 1.5.22)
- You will be considered a “close contact” and asked to quarantine for 5 days if you are not fully vaccinated and were within 6 feet of a COVID positive person for longer than 15 minutes within 48 hours of that person developing symptoms (or testing, if asymptomatic). You will not be considered fully vaccinated if you are more than six months out from your second vaccine dose (more than two months for the Johnson & Johnson vaccine) and not yet boosted. Quarantine exceptions may be made for those who have had COVID in the 90 days prior to exposure, and protocols for quarantine of “close contacts” in clinical settings will be aligned to the CDC’s guidance for healthcare workers and/or the guidelines of clinical agencies. (Updated 8.6.2020; 9.14.20; 1.11.21; 3.3.21; 8.30.21; 1.5.22)
- The isolation period for COVID positive persons who are asymptomatic or have resolving symptoms and no fever for 24 hours (without fever reducing medications) has been reduced to 5 days. Per our clinical agencies, the isolation period will begin with a positive test rather than the onset of symptoms. (Updated 1.5.22)
- Wash and/or sanitize your hands frequently and avoid touching your eyes, nose, mouth, and face covering.
- To supplement professional cleanings, TCC employees and students will be expected to do their own part to ensure cleanliness by sanitizing shared surfaces and equipment in classrooms and common areas after each use.
- All students who plan to be enrolled in a clinical or practicum experience during the 2021-22 Academic Year are required to be fully vaccinated. At this time, students in fully online programs are not required to have the vaccine. However, given that the vaccine is likely to become a permanent requirement for clinical/practicum experiences *and* healthcare employment moving forward, and given the proven safety and effectiveness

of the vaccines available, vaccinating is strongly recommended for all students.
(Updated 8.30.21; 9.29.21; 1.5.22)

Due to the fluid nature of the pandemic, **the contents of this document are subject to change.** A link to this document will be available on the [College's COVID-19 website](#).

Significant changes will be communicated via email. Questions can be directed to Meghan Hollowell, Dean of Student Affairs Meghan.Hollowell@TheChristCollege.edu

Masks and Eye Protection

- You are required to wear a surgical mask at all times on campus, regardless of vaccination status. Cloth face coverings are no longer acceptable. Surgical masks are available at the College's Front Desk. Always wear your mask properly, ensuring your mouth and nose are completely covered. Do not pull your mask down to speak. You do not have to wear a mask if you are eating, but eating in classrooms during class time is not permitted. Perform hand hygiene before and after removing your mask to eat.

While surgical masks are disposable, they should be reused until they are soiled, dampened, ill-fitting or otherwise damaged. When removing a disposable mask, fold the contaminated outer portion together and place in a paper bag. Do not leave a contaminated mask on a counter surface or hanging from a hook. (Updated 8.30.21; 1.5.22)

- Eye protection is required and available at the Front Desk. Eye protection should be re-worn and sanitized with approved disinfectants such as the wipes/spray located at Sanitation Stations throughout TCC buildings. (Updated 1.2.21; 3.17.21; 1.5.22)
 - Personal eyeglasses will not suffice as eye protection. Goggles will fit over most eyeglasses. If goggles do not fit over your eyeglasses, you can retrieve a face shield from the Front Desk. Face shields can serve as eye protection, but they are not approved as an acceptable replacement for a surgical mask at this time. Face shields should be re-worn and sanitized with approved disinfectants. (Updated 1.2.21; 1.5.22)
- It is the expectation that **all** TCC community members help hold one another accountable for wearing their surgical masks properly. If you notice an employee or classmate not wearing a mask (or not wearing their mask properly), kindly remind them of the requirement. If another student or employee refuses to comply, please provide his/her name to the Dean of Student Affairs, Dr. Meghan Hollowell (Meghan.Hollowell@TheChristCollege.edu).
- Avoid touching your mask and eye protection, and perform hand hygiene before and after application, adjustment or removal.

Hand Washing & Sanitizing

- Avoid touching your eyes, nose, mouth, and surgical mask.
- Wash your hands often with soap and water for at least 20 seconds. Cover coughs and sneezes with the inside of your elbow.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry.

- Professional cleaning of high-touch areas will occur daily, and a deep cleaning will occur if warranted. To supplement these efforts, we all must do our part to ensure cleanliness by sanitizing surfaces and equipment after each use in classrooms and common spaces. For this reason, sanitizing wipes or spray are available in each classroom. (Gloves are provided where wipes are available.) If you are in a classroom that is depleted of hand sanitizer, wipes (and/or gloves) or spray, please notify the Front Desk. Wash your hands with soap and water for at least 20 seconds before and after sanitizing surfaces and equipment.
- Sanitizing Stations equipped with sanitizing wipes or spray, hand sanitizer, and gloves (where wipes are available) are located throughout TCC buildings. The sanitizing wipes or spray at these stations should be utilized in common spaces like The Den. If the Sanitation Station near you is depleted, please notify the Front Desk.

Screening and Self-Monitoring

- You are required to take your temperature and assess your symptoms before reporting to campus each day. [Click here to reference the CDC's complete list of symptoms.](#) **If you exhibit any of these symptoms, even if you are vaccinated and/or believe the symptoms could be aligned with another less serious ailment like seasonal allergies, you should remain at home and contact your faculty and the Dean of Student Affairs for next steps.** Keep in communication with your faculty so TCC can help ensure you still have opportunity to meet course outcomes regardless of temporary illness and/or quarantine. (Updated 1.2.21; 8.30.21; 1.5.22)
- **If you test positive for COVID, you will remain in isolation for 5 days from the point of your positive test, or in some cases longer if your symptoms persist.** Please communicate with your faculty accordingly so they can help ensure you still have opportunity to meet course outcomes regardless of temporary illness and/or quarantine. (Updated 1.2.21; 1.5.22)
- If you have been in close contact with a COVID-positive individual, you should notify your faculty and Dean Hollowell. **You will be considered a "close contact" and asked to quarantine for 5 days after your last exposure if you are not fully vaccinated and were within 6 feet of a COVID positive person for longer than 15 minutes within 48 hours of that person developing symptoms (or testing, if asymptomatic). You will not be considered fully vaccinated if you are more than six months out from your second vaccine dose (more than two months after the Johnson & Johnson vaccine) and not yet boosted. Exceptions may be warranted for those who were recently diagnosed with COVID or were exposed in a clinical context.** (Updated 9.14.20; 1.2.21; 3.3.21; 8.30.21; 1.5.22)

Contact Tracing

- Please pay particular attention to those you are in close contact with while on campus for classes or any other activities, especially at lunch time. When attending in-person classes and meetings, attendance may be taken to help ensure accurate contact tracing

is possible, should it be needed. You may also be assigned a seat in your in-person courses to help with contact tracing.

- You will be notified if you may have come into close contact with someone at the college who tests positive for COVID. The name of the COVID positive individual may not be disclosed, but those who are deemed to have been exposed will receive specific guidance on how to manage their risk and curb transmission. Campus-wide announcements will be made if the Department of Health deems the positive case a threat to our community. (Updated 1.5.22)

Distancing & Capacity

- When on campus, individuals who are not fully vaccinated should maintain a physical distance of at least 6 feet (approximately two arms' length) from others at all times. (Updated 1.5.22)
- When occupying common spaces such as bathrooms and kitchens, be mindful of how many others are using the space, and stagger occupancy to avoid overcrowding. This will be especially important in dining areas where face coverings are not being worn. Remember that restrooms are available on all floors of Main Campus.
- Classrooms and labs have been restricted to 75% capacity. Individual seats are available in those spaces for unvaccinated students who need to distance. (Updated 8.30.21)
- There are single seats and seats with tables available on each floor of the building should you need a place to access an online course while on campus. An empty classroom or meeting space can also be used for this purpose, but you should check first with the Front Desk staff to ensure the space will be empty for the duration of your online class.

Teaching and Learning

- Teaching and learning in the 2021-22 academic year may include in-person, online, hybrid and HyFlex options, defined below. Before reporting to campus for class, it's advisable to check Blackboard announcements and/or any emails from faculty. During peak periods, there may be cause for moving in-person sessions to an online format quickly and temporarily. (Updated 1.5.22)
 - In-Person teaching and learning requires participants to be in the same physical location at the same time. In-person courses and learning experiences must allow for physical distancing among unvaccinated individuals and other health-promoting behaviors.
 - Online courses and experiences are conducted in a completely digital manner.

- Synchronous online courses are those that are “live streaming” via Collaborate or Teams. As such, these courses have a designated class meeting time when students and faculty are expected to sign in. In this regard, a synchronous online course is like an in-person class since it allows everyone to be together and engaged in learning activities in real time.
- Asynchronous online courses are those that have learning activities you can view and complete at a time that is convenient for you. There is no designated “class time” for asynchronous coursework.
- Hybrid classes have some in-person learning, while other learning activities take place in synchronous and asynchronous formats.
- HyFlex instruction is defined as an instructor teaching an in-person course while each individual student has the choice to participate in person or participate online via a live stream from the classroom. HyFlex is a new modality for TCC; as such, the considerations and logistics for ensuring a smooth experience for both students and faculty are still being explored.
- You should check SONIS for your most up-to-date course schedule, paying particular attention to the modality and room as it may have recently changed.
 - For in-person courses: a date, room number and meeting time will be listed on your schedule.
 - For online courses: an indication of “ONL” with no meeting time listed will appear on your schedule.
 - For online synchronous courses: a location of "OS" will be listed on your schedule, along with an indication of what days/times the class will meet in real time on Collaborate or Teams.
 - For hybrid courses: designated meeting dates/times for in-person portions of the course (usually lecture, lab or clinical) will be listed on your schedule.
- If you have an online synchronous course, you should make every effort to attend that class at the time it is scheduled. This will allow you to take part in valuable learning activities while engaging in real time with your peers and faculty via Collaborate or Teams. To serve working adults, students with children, part-time students and students residing in other time zones, synchronous sessions may be recorded and made available for on-demand access. Please speak with your faculty about accessing recorded sessions, where applicable.

- There may be times when students have to sign into a synchronous online course either immediately before or immediately after attending an on-site lab or clinical experience. There are single seats and seats with tables available on each floor of main campus should you need a place to access an online course. You can also use an empty classroom for this purpose, but you should check first with the Front Desk staff to ensure the classroom will be available for the duration of your online class. You should bring a headset to campus with you for engagement in online courses while on campus. If you have forgotten your headset, please see the Front Desk staff.
- Faculty are prepared to provide reasonable adjustments for students who are experiencing extreme and extenuating circumstances. If you are experiencing barriers to your learning, please reach out to your faculty and Academic Advisor immediately. (Updated 1.2.21; 8.30.21)
- If you have a class that is scheduled to take place in person, but you feel uncomfortable coming to campus at this time, you reserve the right to drop that course. A full refund will be issued if the course is dropped prior to the 100% refund date found in the [Academic Calendar](#). In some cases, dropping a course may result in delayed graduation or licensure/certification. Please work directly with your Academic Advisor to identify your options.

Clinical/Practicum Considerations and Experiential Learning

- Students who have experiences in the clinical context must follow the protocols and guidance of any health system or clinical entity in which they participate in clinical or practicum activities. All students who plan to be enrolled in a clinical or practicum experience are required to be vaccinated by the deadlines communicated via Employee Health and the TCC Clinical Coordinator. Students with a medical or religious reason for not being vaccinated may apply for an exemption (again, by the deadlines communicated via Employee Health and the TCC Clinical Coordinator). At this time, students enrolled in fully online programs are not required to have the vaccine. However, given that the vaccine is likely to become a permanent requirement for clinical/practicum experiences *and* healthcare employment moving forward, and given the proven safety and effectiveness of the vaccines available, vaccinating is strongly recommended for all students. (Updated 1.2.21; 8.30.21; 9.29.21; 1.5.22)
- The Health Sciences Division works to identify virtual options for service learning, internships etc. and determine which agencies can still safely host in-person service opportunities for students.

Parking

- Students who purchase a parking pass will be assigned to park at The Commons or the Central Business Office (CBO) located on Taft Rd. Utilization of these uncovered lots will

allow TCC to lease large shuttles as warranted to accommodate physical distancing. Surgical masks must be worn by shuttle riders at all times. (Updated 1.5.22)

Travel and Events

College travel has been suspended until further notice. If traveling for personal reasons, be aware that the COVID-19 outbreak in the United States is evolving. The status of the outbreak varies by location, and state and local authorities are frequently updating their guidance. Parts of the country may have different guidance than other areas. All travelers are advised to check with state and local authorities on the prevalence of the virus and area-specific guidance at the starting point of their travels, along the route, and at the planned destination to be aware of any local circumstances and restrictions that may be in place. The Ohio Department of Health encourages Ohioans to carefully review Centers for Disease Control and Prevention (CDC) guidance when considering travel. (Updated 9.14.20; 3.17.21; 8.30.21; 1.5.22)

Large events can significantly increase the risk of transmission of COVID-19, particularly if attendees are not vaccinated. As such, large events must be evaluated on a case-by-case basis with consideration to the prevalence of cases and the importance of the event as related to the mission of TCC and the cultural life of the campus, as well as the ability to conduct in-person events within established safety protocols that include social distancing, masking, and sanitization. Student Activity Fees have been reduced to account for a decrease in large on-site programs. However, TCC is committed to ensuring you are able to engage with our campus and your peers in safe ways; small in-person and virtual programs will be offered throughout the year, where possible. Keep an eye on your college email account for more information about these events as they are thoughtfully planned with your wellness in mind. (Updated 1.2.21; 8.30.21; 1.5.22)

Student Resources

Technology Support

Reliable technology is needed now more than ever. As always, students are expected to adhere to the College's technology requirements ([accessible here](#)). However, if you believe access to technology could be a barrier to your success, please reach out to your Academic Advisor.

As always, the College's Ed Tech Student Support Specialists are happy to answer any questions you may have:

- Jerilin Morris (Blackboard and software support):
 - 513-585-3140; Jerilin.Morris@TheChristCollege.edu
- Sam Carlascio (hardware support):
 - 513-585-2879; Samuel.Carlascio@TheChristCollege.edu

Library Resources

Library services are available in person from 8:30a – 5p Monday – Friday. (Hours subject to change.) Online resources can still be accessed via the Library page on Blackboard. As always, students can request appointments for help with literature searches, to request articles for assignments, and to obtain database instruction.

Library Staff can be reached via email at TCH_Library@TheChristHospital.com or by calling (513) 585-2737.

Tutoring

Academic support and tutoring services are available through TCC's Student Success Center. In-person and online tutoring support is available in nursing, math, writing and science. [Click here](#) to schedule a tutoring appointment. Online tutoring will take place via Collaborate or Teams, allowing for an interactive appointment between the tutor and student. Regardless of the format of your appointment, TCC Student Success Center staff are ready to support you!

For questions, please contact Brittany York, Student Success Center Coordinator at Brittany.York@TheChristCollege.edu. (Updated 1.2.21; 8.30.21)

Mental Health Support - IMPACT

The IMPACT Student Life Assistance Program is a resource to help students manage emotional and academic stress and the demands associated with balancing school, work, daily living, family and relationship concerns. All IMPACT counselors are qualified masters/doctoral level professionals. The IMPACT Program includes access to:

- 24/7 live in-the-moment support
- Up to 3 face-to-face coaching/counseling sessions per issue (Virtual appointments are now available!) (Updated 1.2.21)
- Daily living resources and referral assistance
- Online resources on a variety of topics

IMPACT access is extended to students' household members, dependents in/away from home and parents/parent-in-laws. For more information about how to access IMPACT, visit the Student Success tab in Blackboard or reach out to your Academic Advisor.

Hardship Assistance

Sometimes, unexpected circumstances like a medical emergency, a natural disaster, a car accident or even divorce can create financial hardships that make completing a degree seem impossible. But temporary hurdles do not have to mean that your dreams of becoming a healthcare provider will come to an end. Hardship support is available for emergency financial assistance to TCC students who have exhausted all resources and are still unable to meet immediate, essential needs due to a temporary and unexpected hardship including income loss due to COVID. The fund is designated to offset a short-term need related to living expenses.

Students can now also use this form to apply for assistance with technology-related needs! (Updated 1.2.21; 8.30.21; 1.5.22)

Students who believe they may qualify should [click here](#) to complete the application.

Food Pantry

The College's Food Pantry is still accessible to all students. If you would like access to the Food Pantry, please contact your Academic Advisor.

Accommodations

While the requirements and guidelines outlined in this document are in place to ensure a healthy and safe campus environment, reasonable accommodations continue to be provided for students who have documentation that warrants disability services. For questions about your eligibility, please contact the Student Success Center Coordinator, Brittany York: Brittany.York@TheChristCollege.edu. (Updated 9.14.20; 1.2.21; 8.30.21)

Modifications for Pregnancy and Support Response for Sexual Misconduct

The College continues to offer support under Title IX and VAWA. Under the policy, if you are pregnant, you may receive Pregnancy and Parenting modifications by entering that process through the Deputy Title IX Coordinator, Anita Frazier. Sexual misconduct may also be reported to Anita by email at Anita.Frazier@TheChristCollege.edu or by calling 513-585-0180.

COVID Information

In addition to this COVID response document and any College updates located at <https://www.thechristcollege.edu/COVID19>, below are some federal and state resources that provide guidance on the ways you can best support your own health and safety:

- [The Centers for Disease Control and Prevention](#) (CDC) Coronavirus (COVID-19) homepage includes links to the following information:
 - [How to protect yourself](#)
 - [What to do if you are sick](#)
 - [Symptoms of COVID-19](#)
 - [People at increased risk](#)
 - [Should you get tested](#)

- Local resources are as follows:
 - [Hamilton County](#)
 - [Ohio Governor's Website](#)
 - [Covid-19 State \(OH\) Resources](#)
